POWEREASE ENGINES

POWER YOU CAN COUNT ON.

Introducing the **Powerease** engine designed for the new line of New Holland power equipment. Our industrial grade OHV engines are built with quality and performance in mind and designed specifically for our new cold water pressure washers, industrial grade generators and water transfer pumps.

Powerease engines and equipment driven by Powerease have been imported to North America for the past 6 years and are tested to the highest safety and performance standards, meeting the rigorous demands set by the EPA and CSA. Offering a high quality product with affordability in mind, the manufacturing arm of Powerease produces more than 400,000 engines per year, and has earned large contracts with companies such as Fuji Industries (the parent company of Robin Subaru engines).

Powerease uses the most modern automated machinery to manufacture the engines and generators. **Powerease** is proving to be the go to company for import engines that both meet the quality a customer expects, while delivering equipment at a cost for today's price conscious consumer.

LARGE METAL GAS TANK ALLOWS FOR EXTENDED RUN TIMES

OVER HEAD VALVE DESIGN PROVIDES BETTER FUEL EFFICIENCY

EASY ACCESS CHOKE, THROTTLE & FUEL SHUT OFF

LARGE, DURABLE RECOIL MAKES FOR EASY STARTING

LOW OIL SHUTDOWN

A CAST IRON CYLINDER, BORE & STEEL FORGED CRANKSHAFT ADD PROTECTION UNDER LOAD

POWEREASE DRIVEN PRODUCTS

2" WATER PUMP
Part No. MNW27R

9000 WATT GENERATOR
Part No. MN9000ER

3100 PSI PRESSURE WASHER
Part No. MN317RX
