

ENHANCE PERFORMANCE

Get more acres sprayed quickly, accurately, and evenly during the day, at low light, or at night.

New Holland Spray Performance Tools

CNH Parts & Service is pleased to announce a new program to support spraying applications. Effective spray application increases yield and profit. Spraying is expensive so make every droplet count. These Spray Performance Tools help ensure you are spraying as effectively as possible while minimizing cost and maximizing profit.

Sprayer LED Light Kit

High intensity LED lights illuminate the spray from each nozzle so you can easily see the pattern from the cab.

- Spraying when there is low or no light lets you get more acres done and apply spray more effectively
- Patent pending strobe feature “freezes” spray pattern to reveal distortions from blockage or wear
- Allows for night spraying when plants are less stressed, evaporation is slower, and there is less wind and spray drift

Sprayer Performance Kit

The Spray Performance Kit helps you maximize spray application results so you can maximize profits. This kit has everything you need to ensure optimal application... all in one convenient kit.

- Spray Nozzle Calibrator
- Spray Boom Remote Control
- Wind / Temperature / Dew Point Meter
- Water PH Tester
- Spray Nozzle Air Blaster, Pressure Gauge, and Cleaner Brush
- Safety Gloves and Glasses
- Rugged, Compact Case with Storage Space (for extra nozzles and bodies)
